Los Osos, CA 93402In re: KGDP-FM, Santa Maria, CA
People of Action
Construction permit BMPED-20030221.AAN
Request for Program Test Authority

Dear Mr. Patterson:

Your letter of June 8, 2003 requests program test authority for KGDP-FM, Santa Maria, CA. As we had discussed earlier by telephone, and in compliance with 47 CFR Section 73.1690, the constructed facility lowers the height of the antenna radiation center by 3 meters. This change eliminates the need for directional antenna measurements on the collocated antenna system for KPAT, Orcutt, CA, as required in Condition 6 on the construction permit.

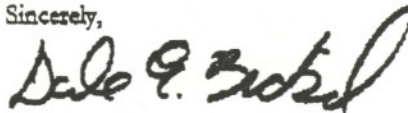

I have reviewed the exhibits provided with your letter, and concur that the conditions on the construction permit have been filed. Accordingly, PROGRAM TEST AUTHORITY IS GRANTED, subject to the following conditions:

- 1) KGDP-FM must electronically file a license application on FCC Form 302-FM no later than June 27, 2003 to cover construction permit BMPED-20030221.AAN. (Electronic filing is made through the FCC's Web site at http://syraxis2.fcc.gov/prod/cdbs/forms/prod/calls_eform.)
- 2) The electronically filed Form 302-FM application must include a copy of this letter.
- 3) The electronically filed Form 302-FM must include copies of the exhibits submitted with your June 8, 2003 letter.

Once the license application has been filed, KGDP-FM may electronically file a new minor change construction permit application on FCC Form 340 for the facilities on the 200 foot tower specified in its original construction permit BPED-19970328MLD. That will protect the station's desired service area from later-filed construction permit applications filed by other stations while the County of Santa Barbara considers a Conditional Use Permit.

Sincerely,

Dale E. Riesel
Senior Electronic Engineer
